SUMMARY

Full Stack Software Engineer with 2+ years of experience designing and building scalable backend systems using **Java**, **Spring Boot**, **RabbitMQ**, and **Redis**, alongside frontend development in **React.js** and **Angular**. Skilled in system design, distributed architectures, and caching strategies, with a focus on building reliable, scalable services end-to-end.

WORK EXPERIENCE

Retenzy.com

Software Engineer (Fullstack)

Pune, India

May 2025 – Present

- Improved merchant-facing page load by **2–4x** by implementing a Redis-based caching layer on the backend and reusable React hooks on the frontend, boosting user engagement.
- Engineered a full-stack React/Node.js analytics dashboard with **Chart.js**, integrating backend APIs to deliver real-time KPIs for reviews, rewards, referrals, and VIP programs.
- Built AI-powered merchant onboarding that automatically detects store colors and branding, reducing manual setup from 2 hours to near-instant.
- Designed and deployed a distributed email notification system handling **20k–40k** users using SendGrid and **BullMQ** for queue-based job processing, ensuring reliable, non-blocking async communication.
- Integrated **WhatsApp** messaging, **GoKwik**, and checkout to enhance customer communication and payment.

Taxbuddy.com

Software Engineer (Frontend)

Pune, India

Aug 2024 – Feb 2025

- Supported the operational team in streamlining the **ITR filing** process by implementing user-friendly enhancements, reducing filing time by 20% and enabling a more efficient workflow.
- Implemented a file upload system to automatically populate data in 0.9 seconds, optimizing data handling and enhancing the operational team's productivity.
- Developed a seamless and responsive **KYC** journey for Mutual Fund, optimizing workflows, validations, and API integration, achieving a 2x reduction in drop-off rates.
- Spearheaded UI improvements for 10k+ users, optimizing navigation and task completion in ITR filing.

SKILLS

- Languages:** Java, JavaScript, TypeScript, SQL, C/C++
- Frontend:** React.js, Redux Toolkit, Angular, Next.js
- Backend:** Node.js, Express.js, Spring, Spring Boot, REST APIs, RabbitMQ, Redis, BullMQ, Sequelize
- Databases:** MySQL, PostgreSQL, MongoDB
- Cloud & Tools:** AWS (EC2, S3, Lambda), Git, Maven, JUnit

PROJECTS

Email Service Platform

[Project link](#)

- Tech Stack: Java 17, Spring Boot 3, Spring Cloud Gateway, React 18, TypeScript, RabbitMQ, Redis, PostgreSQL
- Built a full-stack **microservices**-based bulk email campaign platform with an **API Gateway** and independent services for audience, campaigns, templates, delivery, and tracking.
- Implemented asynchronous high-volume email delivery using **RabbitMQ** + **Redis** rate limiting and live progress tracking to safely handle provider limits.
- Developed a contact import pipeline supporting **CSV/Excel** with header inspection, field mapping, deduplication, and async processing via message queues.
- Designed a real-time open/click tracking system and campaign analytics dashboard with **live** metrics powered by Redis counters.
- Delivered an end-to-end solution including **JWT** authentication, a block-based template editor, a 4-step campaign wizard, and **SMTP** integration (SendGrid/SES style).

EDUCATION

Dr. Babasaheb Ambedkar Technological University

Bachelor of Technology, Information Technology (CGPA: 8.40)

Nagpur, India

Jan 2020 – Apr 2024

ACHIEVEMENTS

- Authored and merged multiple pull requests into open-source repositories including [adobe/react-spectrum](#), [Excalidraw Libraries](#), and [facebook/astrix](#).
- Built [InvoiceMitra.in](#), serving 1,000+ users (SMEs & MSMEs) with invoicing, inventory & payment tools.
- Achieved 2nd place in the Mercor TextBase Hackathon, competing against more than 18,000 participants.
